

Si Wu

Portfolio

Cell: 857-756-3930 | wu.si1@husky.neu.edu | [LinkedIn: Si \(Floris\) Wu](#)

EDUCATION

- Northeastern University, M.A. in data journalism, GPA: 3.67, Boston, MA. expected May 2020
- Durham University, Postgraduate Certificate in Education, Durham, U.K. Sept. 2016 – June 2017
- Imperial College London, BSc in physics, London, U.K. Sept. 2013 – June 2016
- Languages: English (fluent), Mandarin and Cantonese (native).
- Computing Skills: Python (expert); JavaScript, Machine Learning, HTML, CSS, R and GIS.
- Software: Microsoft Office, Final Cut Pro, Adobe Premier, WordPress, Tableau.

WORK EXPERIENCE

Data Visualization Intern, [Harvard Data Science Review](#): Sept. 2019 – Present

- Design and develop data visualization to effectively communicate data science concepts.

Data Science Research Fellow, [MIT/Tufts University](#): June 2019 – Aug. 2019

- Researched for the [Metric Geometry and Gerrymandering Group](#), whose mission is to study applications of geometry and computing to U.S. redistricting.
- Compiled interpretable figures with census data and GIS shapefiles by applying math techniques such as Markov Chain Monte Carlo, multi-objective optimization, transport distances and network.
- Contributed to Geometry of Partitions via Optimal Transport, a paper supervised by Justin Solomon at MIT.
- Developed JavaScript projects for data visualization and outreach.

Data Science Researcher, [Storybench.org](#): April 2018 – Present

Sentiment analysis project -

- Scraped Twitter and Reddit data with Python and R.
- Applied machine learning techniques on tweets from midterm election candidates to predict positive/negative sentiment.
- Results were published at [Roll Call](#).

Airplane noise project -

- Researched and collected airplane noise data from various data sources, such as researchers and advocacy groups.
- Explored GIS tools such as Google Maps and laid out shapefiles in Python.

Writer, [Storybench.org](#): Aug. 2018 – Present

- Write articles on digital storytelling, including machine learning, data journalism, augmented reality app and podcast.

Faculty Teaching Assistant, [Northeastern University](#): Sept. 2018 – Nov. 2018

- Taught classes on topics such as the writing of obituaries, leads and nut graphs in news stories.
- Assigned and graded homework.
- Assisted students in and outside of class on topics such as Associated Press style of writing and grammar.

PAST ACADEMIC EXPERIENCE

Computing projects, [Imperial College London](#): Sept. 2013 – June 2016

Python projects:

- Used data from type Ia supernova and statistical methods such as MCMC to estimate cosmological parameter values.
- Analyzed and presented graphs of motion and energies of a satellite travelling around Mars.
- Recorded and analyzed trajectories of rays propagating and refracting at boundaries between different medium.

Assembly project:

- Used assembly language to design a pong game on an oscilloscope.
